

THE POST-ITC LEAD PLAYBOOK

Fill your sales funnel with quality leads, post-ITC

Getting found and closing deals are both systems now.
Here's what to act on this month.

1 Get recommended by AI: your site checklist

AI tools don't rank installers. **They recommend the ones they can verify**, and those usually aren't the biggest companies.

Who's a reputable solar installer in Mesa?

AI ANSWER

1. **Installer A:** 4.9★ reviews
2. **Installer B:** on EnergySage
3. **Installer C:** reviews name Mesa

Is your company here?

45%

of consumers ask AI for local business picks

1.2%

of businesses get recommended by ChatGPT

BrightLocal 2026; SOCI 2026 Local Visibility Index

- ☐ **Your homepage's first line says what, where and for whom**

"Solar and battery installer serving Mesa and Gilbert since 2015."

- ☐ **Your Google Business Profile is fully built out**

Every city and service, real photos, a monthly post. The biggest single lever.

- ☐ **Your service-area cities are listed as text**

Each city gets its own page with real local detail.

- ☐ **Your reviews name the city and the product**

AI reads the words, not just the stars.

- ☐ **Sites you don't own vouch for you**

EnergySage, SolarReviews, manufacturer listings, local news.

- ☐ **Your FAQ answers post-ITC questions**

"Is solar still worth it without the tax credit?"

Only time for one thing? Reviews plus a complete Google Business Profile.

2 Ads: what actually works

Jordyn Dollarhide in a Damaris ad: a local face, a local hook

Every ad has three jobs

Stop the scroll → Educate → Convert

- **Video, with a local face**

It beats static almost every time.

- **Lead with the bill and backup power**

The 30% credit message is gone.

- **Small budget? Start on Meta**

Add Google once search demand shows up.

- **Track cost per closed deal**

A \$40 lead that never sits costs more than a \$120 lead that closes.

- **Stop the leaks**

Too-wide targeting, ads sent to your homepage, slow callbacks.

- **Call fast**

Text within a minute, call within 5.

- **Give an ad about 2 weeks**

Judge it on appointments, not clicks.

3 How the drone changes the sales conversation

90%

reduction in site survey time

20%

increase in close rates vs. satellite imagery-based proposals

ZERO

install-day revisions or change orders

- **It earns trust before price comes up**
Flying at the appointment shows you know your stuff.
- **One flight becomes a neighborhood event**
Neighbors come outside, and the street turns into referrals.
- **The 3D model ends the doubt**
Homeowners stop questioning the numbers once they see their home.
- **Reuse it as marketing**
Put the model in the follow-up email and the install video in a zip-code ad.

4 Plug in Bodhi to keep every homeowner warm

DECIDING

Improve conversion and reduce cancellations by 5%

Automated journeys keep homeowners engaged during the decision window with the proposal recap, testimonials and the "is it still worth it?" FAQ.

INSTALLING

Increase staff productivity by 67%

Automatic updates and a branded portal cover permitting, interconnection and inspection, so your team fields fewer "where's my project?" calls.

LIVE

Increase referrals by 30%

A review and referral program turns happy customers into the city-and-product reviews AI looks for, and into referrals.
